FOOD ALLERGIES AND INTOLERANCES

Dear Parents/Guardians

As part of your son or daughters' studies this year, he or she will be working in the school's Food Technology Lab or Trade Skills Centre. In order to minimise the risks to all students, we need to be aware of any food allergies or intolerances that he or she may suffer.

Our faculty is implementing the latest DEC policy whereby we do not include any nuts or ingredients derived from nuts in our recipes. However, there will be other ingredients present in the faculty to which your son or daughter may react. Staff will make every effort to ensure your child is not placed at risk. We cannot guarantee that utensils used in the food lab/ TSC have not been in contact with allergens in previous uses or that minute quantities of these substances are not present in the products used. It should be noted that students are not obliged to consume anything that they have cooked, although they are generally expected to participate in the preparation of cooking the food, as these experiences contribute to course outcomes.

Please complete the tear-off section below and return it to the class teacher immediately. Students will be able to participate in practical lessons once this document has been returned.
This document will be kept on file for the remainder of this year.

Yours Sincerely

Ms C Constable
Head Teacher
Technological & Applied Studies Department
